

## BUILD YOUR OWN 2006-07 REFERENCE MANUAL

This comprehensive page has been designed to be a quick reference for a wide array of financial aid topics. It allows you the flexibility to quickly select and print pages, as if you were designing your own reference manual. Select the topics that you will find the most helpful in meeting the challenges of your daily job and to meet the needs of your students and parents.

Be aware that all pages can be found in the 2006-07 FAFSA Completion section and were originally designed for Web access. Links within the text obviously will be lost if pages are printed and maintained in a manual. When printing from **collegezone.com**, click the "Printable version" icon on the bottom of a page and then select "print page" from the top of the next page that appears. The date will print at the bottom of each page.

Check back often to be sure pages that you have printed have not been updated with more up-to-date and timely information.
